BOSS Pre-Wet System

Features & Benefits:

- Available accessory on all new VBX and Forge spreaders. Features an Integrated Control System for ease of installation and operation.
- Equipped with efficient spreading controls allowing the operator to adjust the flow rate proportional to the feed rate of the dry material for the optimal ratio of brine to dry material.
- Equipped with a 60-gallon tank capacity.
- Features a clear tank allowing for ease of visibility of the liquid level.
- Designed for optimal weight distribution, mounting the tank near the cab of the vehicle.
- Features a dump hose allowing for ease of use when emptying the brine following use.
- Includes stainless-steel straps to secure the system to the spreader by utilizing the frame rails.
